**This is done to prevent a good team from saying they are weak and running away with the entire division. A few years ago a team in another tournament won with over a +66 goal differential. In our format you could potentially lose all round robin games and still advance to play for some hardware versus like skilled teams.**

**40 teams will be split into 4 divisions. We'll try to have every team in every division play each team in their division based on your standings you'll play other teams in other divisions that finished in the same position after round robin for that color championship**
