How to determine GFA Formula

GFA closest to 1.000 advances

Goals for + Goals against = total goals; GFA = goals for divided by total goals.

Example: $25 + 15 = 40$; $GFA = 25/40 = .625$

OVERTIME GAME PLAY

If there is a tie after regulation time in the Semi-Final or Championship Final game, a sudden victory 10:00 minute stop-time period with 3 skaters vs. 3 skaters (with goalies) will commence. If the game remains tied, continuous 10:00 minute stop-time periods with 3 skaters vs. 3 skaters (with goalies) until a sudden victory is determined. All penalties being served at the end of regulation will carry over into overtime. By way of example, if regulation time ends and there is a 5 on 3 situation, teams will start the overtime 5 on 3. Once player strength reaches 5 on 4 or 5 on 5, at the next stoppage of play, player strength is adjusted to 4 on 3 or 3 on 3, as appropriate. If the teams start the overtime 4 on 3, once the teams are returned to full strength, the teams will return to 3 on 3 at the next stoppage in play.
